

**Specification**

Core outer dia.	: 90 mm
Stack height	: 80mm
Wire size	: 0.50 mm
Winding Speed	: 1500 rpm
Programs	: 499
Power	: Single phase, 230 V, 300Watts
Foot print	: 570(W) X 280(L)
Height	: 1020 mm

MOTOWIND – SLT 80M is a High Speed flyer type table top rotor Winding Machine. The machine is used to mass produce brushless DC Servo Motors, AC and DC motors. Simple tooling makes the machine very flexible to adapt different application.

Ergonomically positioned operator console, component placement, seating posture facilitates fatigue free production.
